Google	8

DOMAIN

Your domain provider is the service that provides your website address (commonly referred to as the URL). It manages all of the important Domain Nameserver (DNS) records which identify where your data is stored and where to point your URLs.

Your domain provider is: 123-Reg

URL: <https://www.123-reg.co.uk/public/login>

Your login details:

Username: polaroad@mail.com

Password: Risalpur6513

HOSTING

Your web host is the service that stores all of your website files on the internet. They also provide management services for this purpose and can be contacted for any queries relating to your server.

The Server you have been set up on is SiteGround's "Entry" Cloud Hosting. The features included are:

- 2x CPU Cores
- 4GB RAM
- 40GB SSD Space
- 5TB Bandwidth

For more information: <https://www.siteground.co.uk/cloud-hosting.htm>

Your hosting provider is: SiteGround

URL: <https://ua.siteground.com/login.htm>

Your login details:

Username: polaroad@mail.com

Password: x53HjdO&aWhpLR8

WHM / CONTROL PANEL

When you sign up for a web hosting service, you are automatically provided with server space to store your website files, along with web addresses and their corresponding emails (among other things). To manage these services, software is installed on your server. This software is called cPanel/WHM.

cPanel provides links to important features such as creating new email addresses and FTP account. It is also possible to access PHPmyAdmin and your SQL database from the menu. It is recommended that power settings and features only be changed by an experienced web developer as many settings can directly affect the performance of your website and mail server.

Your WHM / cPanel can be accessed from your web host.

For direct login: <https://c56085.sgvps.net:2083/>
<https://c56085.sgvps.net:2087/>

Your login details:

Username:	anwars85
Password:	6,JAHp=S#Lg5

FTP

FTP credentials are very important as they allow access to all files stored on your server (like accessing a hard drive on your computer). You can access these files either through your cPanel, or by using an FTP client such as FileZilla. A default admin account was created for you prior to beginning web development which gives access to the root folder of your server storage.

There are four credentials for your Administrator FTP account: the hostname, the FTP connection port, the username and password.

Your login details:

Hostname:	c56085.sgvps.net
Username:	anwars85
Password:	6,JAHp=S#Lg5
Port:	21

EMAIL

As requested, three email accounts were set up on the @polaroad.co.uk domain. These can be accessed through cPanel by clicking on the 'Email Accounts' menu option.

Instructions for setting up each email account can be found by selecting the link to set up an email client within the 'Email Accounts' area of the cPanel menu. A variety of instructions are given for different email management software or each address can be set up manually using the TLS/SSL IMAP or POP3 server settings given. There are also setting for unencrypted (non-SSL/TLS) access [NOT RECOMMENDED].

You may also access your email accounts via the webmail service at:

<https://polaroad.co.uk/webmail>

Your email accounts:

Address:	Password:
accounts@polaroad.co.uk	yB1a7#SE&%t5yjR
admin@polaroad.co.uk	63o^@H6DM43KL6t
enquiries@polaroad.co.uk	dO90!ER!A2cBTa!
media@polaroad.co.uk	fWG8Z-uZZZ.(
anwar@polaroad.co.uk	Y0w@9d@CsYL1ZOJ
paul@polaroad.co.uk	Z82Zk^Vmi1S7^C!
shahnaz@polaroad.co.uk	=V\$,15ZiIXJw[ZQ
summayyah@polaroad.co.uk	5ONRR?815?8[Zwv
nabila@polaroad.co.uk	nc_tZ7BO.T_;
john@polaroad.co.uk	ao)S-RC=[ASF

Your server settings are:

Username: Use the full email address.

Password: Use the email account's password.

Incoming Server: mail.polaroad.co.uk

IMAP Port: 993

POP3 Port: 995

Outgoing Server: mail.polaroad.co.uk

SMTP Port: 465

Authentication is required for IMAP, POP3, and SMTP.

DATABASES

The vast majority of websites require a database to store different information. Your website also has a database for this purpose. Your website is using an SQL database to store all of the data such as products, prices and links to pictures in one place.

Your SQL database is the main building block of your website. If it is compromised, all of the data stored within it may also be compromised therefore it is important to ensure it remains clean of useless information, it is secure and that audits are done to ensure the security of your database is robust.

Upon creation of your database, it was given a unique prefix in order to prevent brute force attacks. Your SQL database was also given a name in order to attach it to your website.

Any changes to the content of your website will be stored in your SQL database.

There are two databases used for your software.

Your login details:

Database Name / Username:	Password:
anwars85_wp124	S78.-2732p
anwars85_ad125	n#^o~Gnpm9R_

WORDPRESS

WordPress is the CMS used to build your website. Your website consists of two components: the Backend and the Frontend. The backend of your website houses the WordPress control panel that allows changes to be made to what is displayed on the frontend. The frontend, therefore, is what a visitor to your website will see when they reach your web address. WordPress has its own account details to allow access to the backend control panel.

Any changes to the content of your website will be done through the WordPress backend.

Your WordPress control panel can be accessed here:

<https://polaroad.co.uk/wp-admin/>

Your login details:

Username: etn7n

Password: edln7!7aqXpKV4Q

GOOGLE

Google is the largest and most popular Search Engine on the web. This means it is especially important for any information hosted online to be visible when someone searches using Google search. Having a tailored Google account helps achieve this goal, providing free access to some of Google's services such as Google Maps, Google Search Console and Google Business Listings among others.

You have had a Google account set up for your business listing. This was done to ensure your search results will appear correctly, but also for Search Engine Optimisation (SEO) and correct visibility.

Your Google account can be accessed here:

<https://account.google.com/>

Your login details:

Email: anwar@polaroad.co.uk

Password: S6dR1#qLZ1BXUiU

Your Cloud Identity details:

Email: admin@polaroad.co.uk

Password: 3Qu2UjjL3#uay^o
